## HOW TO USE INDEX

In master index, articles are listed alphabetically by title and are numbered consecutively. Below are cross-indexes which facilitate the finding of an article by author and by subject.

Example: Poverty. 2, 8, 28, 61, 63
Referring back to these numbers in the master index provides the title, page and month for each article on poverty. Thus No. 2 yields the information: "Appalachia—Poverty's Frontline," Page 6, July issue.
